

Solar, sorted

Zero-deposit, all-inclusive solar installation, monitoring and repair package, from £75 a month*

Delivered in partnership with

GreenGenUK

* Price varies, apply for your personal quote. Offers are subject to status and agreement.

The Hometree Solar Plan

Make the switch to clean, green power with confidence. With the Solar Plan you can pay for your new system while you benefit from the energy savings, avoid the burden of monitoring performance, and eliminate the risk of repair costs for the lifetime of your plan.

No upfront cost

There's nothing to pay upfront, just an affordable monthly payment once your new system's been installed.

All-inclusive cover

Equipment inspections and unlimited repairs are included for the lifetime of the plan, with no callout fees or excess.

Performance monitoring

Remote monitoring and periodic inspections enable us to identify and resolve issues impacting power generation or storage.

Replacement protection

If your panels, inverter or battery fail within your plan term and can't be repaired, we'll install replacements at no extra cost.

You're in safe hands

The Solar Plan is delivered through our network of highly qualified engineers. You benefit from the expertise and personal care of an accredited solar business, with the reassurance of Hometree's guarantees and all-inclusive payment package.

UPFRONT

Solar Plan

System installation with lifetime monitoring and repairs included

£74.75 /month*

- ✓ Quality solar panel system from leading brand
- ✓ Battery storage system (optional)
- ✓ Installation by your trusted engineer
- ✓ Performance monitoring and inspections
- ✓ Unlimited system repairs
- ✓ No callout fees or excess for the plan lifetime
- ✓ Flexible term from 5 to 25 years
- ✓ Replacement protection
If any of the installed equipment breaks down within your plan term and can't be repaired, we'll install a replacement.

“Fantastic all the way through and has given us peace of mind. We can't thank you enough and I have already recommended you to friends.”

Gary M
Hometree customer

* Example price for a new installation quoted at £10,000. Based on a 25 year plan. Price varies, apply for your personal quote. Offers are subject to status and hire agreement. Monthly payments are subject to an annual increase of 2.5%. You can end your plan at any time by paying the lump sum outlined in your contract. This will be required if you sell your property. Missing payments could have severe consequences and make obtaining credit more difficult.

Our guarantees

Every new solar installation is backed up by Hometree Finance's guarantees.

Fair price promise

We check quotes against national benchmarks, so you can be confident that your system installation is priced fairly.

Satisfaction guarantee

We'll get in touch after installation and every maintenance visit, to check that you're happy with the engineer's work.

Risk free application

Our secure application takes 2 minutes and won't impact your credit score. There's no obligation to proceed once approved.

Cancel anytime

You can end your plan at any time by paying the lump sum outlined in your agreement. No quibbles or early repayment fees.

Partners you can trust

All our installation partners are **MCS Certified**, insured, and members of a trusted renewable energy consumer code - either **HIES** or **RECC** - to give you confidence that you'll be informed and protected on your home improvement journey.

Renewable energy experts

Independently verified energy saving estimates

Industry leading consumer protection standards

How it works

We're here to help you get a payment plan to fit your needs, hassle free installation, and ongoing comfort about system performance and repairs.

01

Design

Your engineer will survey your property and design a system to suit your lifestyle and power usage. They'll provide detailed equipment specifications and energy-saving estimates.

02

Apply

Alongside their quote, your engineer will send a personal link to apply for the Solar Plan. Complete our simple online application, then you're ready to review and sign our agreement.

03

Install

Your new system is installed, and remote monitoring is set up. We check that you're happy with the work before your monthly payments begin.

04

Relax

For the lifetime of your plan, performance monitoring, equipment inspections and unlimited repairs are taken care of - at no extra cost.

FAQs

**Find out more and view all FAQs
at hometreefinance.co.uk**

Who is the Solar Plan for?

Homeowners installing solar PV systems with optional battery storage in owner-occupied or privately rented properties in England and Wales.

How long is the plan term?

You can choose your term from 5 to 25 years when you apply, enabling you to pay for your system installation while you benefit from the energy savings.

How do I apply?

Your engineer will send you a personal link to apply alongside their installation quote.

Our secure application takes 2 minutes, won't impact your credit score, and provides an instant decision in most cases. There's no obligation to proceed once you've been approved for finance.

What equipment will I get?

Our payment plans are available across a range of leading brands. Your engineer will design an appropriate system, tailored to your property and power usage, and provide detailed specifications and energy-saving estimates during the design process.

How soon can my system be installed?

Lead times depend on your chosen engineer's availability, so it's best to check with them.

Who will install & maintain the system?

We have a nationwide network of highly qualified engineers, who install quality systems and maintain them with care. They'll be friendly, punctual and tidy when working at your property - and we'll check in with you afterwards to make sure you're happy with their work.

Ongoing maintenance will be taken care of by the same engineer, giving you consistent service from a trusted provider. On the rare occasion that they're unavailable, we'll arrange an alternative through our network.

How does the Solar Plan differ from a standard loan?

Financing enables you to spread the cost of your new installation, rather than paying upfront. The Solar Plan offers longer terms than standard loans, enabling you to reduce your monthly payment amount. It also covers monitoring and inspections, so you can have confidence that your system is performing as it should. And with unlimited repairs included and no callout fees, you won't have to worry about unexpected bills for the plan lifetime.

How does the Solar Plan differ from the manufacturer's warranty?

Our pre-emptive service and rapid response sets us apart. Continuous remote system monitoring and periodic on-site inspections enable us to detect and remedy performance issues, before they significantly impact your power generation and storage.

Whereas manufacturers often take days to schedule a visit, we can call upon the engineer who installed your panels and our wider engineer network for repair work.

Warranties may have shorter terms than your chosen plan - particularly for inverters and batteries, where the average expected lifespan is 8 to 15 years. But with the Solar Plan, you have peace of mind that all repairs and replacements are covered for the duration of the plan - up to 25 years.

The plan does not cover removal and replacement of functioning solar equipment for the purpose of making roof repairs.

What if I change my mind?

If you'd like to exit your Solar Plan early or you're selling your property, you can end your plan at any time by paying the lump sum outlined in your contract, with no early repayment or cancellation fees.

What happens at the end of the term?

If you choose to upgrade your system we'll set you up with a new Solar Plan. Otherwise your plan will automatically end as per our terms.

Your trusted engineer

The Solar Plan is delivered in partnership with independent solar businesses. You get the best of both: consistent service from an expert who knows your system, backed up by Hometree's guarantees and all-inclusive payment plan.

- ✓ Qualified & accredited
- ✓ Renewable energy experts
- ✓ 5 star service as standard

GreenGenUK

Your engineer will advise on equipment selection and installation, and send your Solar Plan quote following their survey, with a personal link to apply.
